**Console update to enable new VMware ESX 3.5 agent**

This update contains console updates to support the recently released new agent for VMware ESX 3.5 environment.

Assuria Bulletin #94 introduces the new VMware ESX agent.

**Red Hat Linux**

Red Hat Linux 3, 4, 5: The fpdb file has been updated to map the smmsp group to /etc/aliases.db, if you have customised this userconf file (fpdb) then you will need to re-apply your custom changes to this file. Copies of fpdb pre AU95 will be copied to fpdb.old in the userconf directory.

A new console script called purgeDB allows removal of scans from the database via CLI.
