Title. Assuria Auditor AutoUpdate #97 released

Introduction This update is an Assuria content update. The update is compatible with, and suitable for application to all Assuria Auditor agents.

Contents

Assuria Auditor Remote Adapter (RA) and Assuria Information Manager (AIM) In preparation for the release of Assuria Auditor Remote Adapter (RA) the Assuria Auditor console has been updated and will now start the separately shipped Remote Adapter from either the 'toolbar' or 'menu-bar'.

Similar changes have also been made for Assuria Information Manager (AIM). If the AIM and RA components have been installed, they can both be started from the simple interface, or from the 'toolbar' or 'menu-bar' on the classic interface (this was previously known as the administration interface).

Windows Server 2008 and VISTA An issue with using exceptions on Microsoft Windows Server 2008 and Microsoft Windows Vista has been resolved.

Unused Policy variable The unused policy variable reqdServicePack has been removed from all supported Windows platforms. This has been done to reduce confusion. Affected policies are Initial-5, Initial-All, Maintenance-3, Maintenance-All and sys-info. The check reg-nt-vers-01 has been updated.
